

Services

All Design Approach

Aspid is your complete software application developer, providing all of your software development and service needs. At Aspid we Design, Develop, Document, Deliver, and Warranty your custom software application.

-

Design - We will produce a Requirements Study of your software development project.

-

Develop - aspid's OO-Object Oriented approach ensures that your application is developed with the latest systems design technology of MS Visual Studio or Adobe Flex.

-

Document - Thorough documentation of the software development phase.

-

Deliver - The completed project will be presented with a Structured Walk Through of the program to demonstrate the application and review the Detailed Design Document.

-

Warranty - Aspid provides an industry unique 30 day warranty on all software development for your project! If your application does not perform in the way described in the Detailed Design Document, the aspid will fix it, FREE! More, we provide FREE 60 days bug fix warranty.

Software Development

We develop Client/Server SQL database applications, custom components and ActiveX servers, and create Internet web applications.

Aspid uses technology expertise and business solutions talent to help you build results oriented and effective information applications. Aspid creates effective database solutions for managing complex information used by proactive businesses in today's rapidly changing world.

Aspid Key Benefits

Aspid provides effective solutions expertise in creating

-

Custom Windows Applications

-

Windows based Object-Oriented Programming Logic

-

Software for Microcontroller based systems

-

Fast, Flexible, and Easy to Use Visual Application Interfaces

-

Internet web Enabled Databases - the ultimate client/server front-end

-

Database Enabled web Sites

-

DOS to Windows Application conversions/upgrades

Example Applications Types

-
Financial Budget Management

-
Project Management

-
Complex Data Reporting

-
Embedded System Software

-
Internet Databases

-
Facilities Management

-
Order Placement

-
Database SQL utilities/applications

-
Data Collection & Surveys

-
Network TCP/IP applications and protocols

Software Development Typical Pricing

-			
Project Requirement / Design		\$20	per hour
-			
Application Software Development	\$20		per hour
-			
Low Level System Software Development	\$25		per hour
